Copy of Mine Sites Spreadsheet-for cessation analysis.xlsx

I just added Tallahassee Creek - that is the only mine site we are working on.

Martin,

The EPA is working on getting a handle on our mine site regional work in the wake of the Gold King Incident. I have attached a spreadsheet with a series of questions for each site regarding vulnerability. Could you fill this form out for each of the mining sites that CDPHE is conducting Site Assessment work by Friday morning? Also, you will notice that the response for each question is limited to Yes/No. Thus, it would be helpful to add comments in additional columns, that help understand the type of activities being planned (examples "field work complete, preparing report" or "installation of wells planned for Sept 2015").

Thanks!

Victor
